About company

C o m p a n y

SINVIA KB company was established in 1991.

Since 1991 SinviaKB are one of leading manufacturer for wooden heating systems in Latvia.

Our products such as accumulator tanks for heating systems and wood gasification heating boilers are well known for their quality and durability in Baltic States and Germany.

Our company worked as representative and contract manufacturer for eighteen years in Baltic region for KUNZEL (Germany) during this period we demonstrated that our company is reliable and precise partner. Main production was manufactured and exported to European partner KUNZEL (Germany).

Since 2013 our Company is looking for new business possibilities.

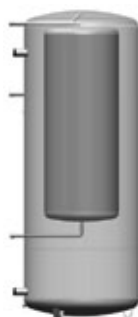

Our company is seeking for business partner who would be interested in metal welded products manufacturing.

Our main strength is highly qualified team (professional management, certified welders, exceptional quality control, assembling experience, precision, high quality standards, packaging and logistics). Gained experience of more than 20 years allows us to perform any kind of complexity tasks with ease and in short terms.

To expand our company's product range and capabilities we are half way through with ISO 9001:2008 certification process.

Product range

Products for Latvia

Accumulators for heating systems
Available: Different volume (100 - 1200 l) & configurations
(with built-in tank, Cu spiral)

SN25K (25 kW) / SN35K (35 kW)
wood gasification heating boilers

Wooden heaters for Sauna

Manufacturing capabilities

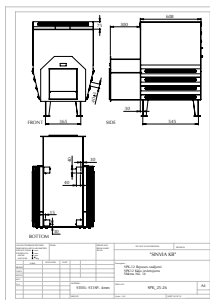

Main advantages

- **22 years experience** in developing and manufacturing different kind of metal products;
- **High product quality**, we give as minimum 2 year manufacturer warranty for standard metal welded products;
- **Stable and Reliable Business partner** - Promises made are promises kept;
- **Experienced and skilled team**;
- **Individual products manufacturing** capabilities, for different quantities.

Technical capabilities

Before- manufacturing processes

- Quicker product manufacturing possibilities if product technical drawings are digitally prepared.
- We can produce technical drawings from product prototype and then manufacture it.
- We can produce prototype/test product before real huge quantities are produced from technical drawings;
- Individual products manufacturing capabilities, with different quantities;
- We are able to create product computer 3D visualization even before real product is manufactured;
- Estimate full product manufacturing cost calculating.

Manufacturing processes

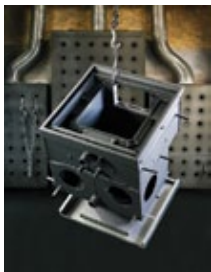

Real Product

Manufacturing capabilities

Manufacturing processes / capabilities

- **Parts preparing before welding:**
 - a) Metal Guillotine (metal up to 3 m width)
 - b) Plasma cutting, Laser CNC cutting sheet size 1,5 x 3m
(for part cutting we cooperate with our local partner);
- **Roll forming service** - sheet metal rolling
(max. diameter of cylindrical covers for accumulator tanks is 780 mm);
- **Metal bending** (ST3SP up to 8 mm thickness);
- **Highly skilled welding** with variable complex products manufacturing;
- **Metal parts painting;**
- **Highly qualify-trained assembly operator** for different complex products
- **Delivery** (on-time)
